LOCATIONS AND SETS

Our region has the unique magic of an ancient, vast and green atlantic land that is among the best natural landscapes in the country. There are dozens of myths and legends around these places, and a lot of productions describe every inch of the terrain and their attractive features, reflecting architecture, geography and climatology. This landscape is dotted with lush forests, wide-flowing rivers, gentle slope mountains and astonishing coasts. A perfect environment for fiction projects which want to capture the essence and light of a historical and mysterious region.

As it is worldwide known, Galicia harbors the Santiago Cathedral, an iconic place for pilgrims that combines Romanesque and Baroque architecture, among other styles. There are also monasteries and other constructions from all eras, as well as modern buildings, which make up a large and diverse natural and urban scene.
