Online programme application for startups and local partners.

Startup evaluation: startups are analyzed and scored by a team of experts according to criteria such as viability of investment in Spain, scalability, technology and team.

Match: the top startups participate in the bootcamp, a 5-day kick-off online programme to discover the innovation ecosystem in Spain, learn about practical aspects of setting up a company in Spain, and meet Spanish corporates and innovation centers potentially interested in their technology solutions.

After the bootcamp, the top 50 startups will sign a collaboration agreement with a local partner and will officially become a participant in the VI Edition of the Rising UP in Spain programme.

Setting up a company in Spain: the local partner will host the startup for at least 6 months during the collaboration project. ICEX-Invest in Spain will assist the startup in setting up the company in Spain through services such as a customized acceleration programme, introduction to relevant contacts within the startup's industry, fundraising sources and legal advice.
